# Suntracker DIN 72103 NFC/72203 NFC Two Module, One or Two Channel Time Switch 

## Benefits

A two module wide, single channel, astronomical timer that it is designed to control various lighting loads (including LED lighting) automatically according to sunrise and sunset times.

Examples of applications: street lighting, neon signs, festive lighting, store windows, monuments, frontages, etc. Requires minimum time to set up and includes an optional night program.

This time switch is NFC enabled, the same as 'contactless' bank cards. With just one tap you can connect to an NFC-enabled Android smartphone or tablet to program the switch or to transfer settings across multiple switches. This is optional, switch settings can still be controlled on-unit if required.

Product requires an Android device with an NFC chip included. App requires Android 3.0 or above.

## Features

- 1 channel (72103 NFC) or 2 channel (72203 NFC)
- Daily and weekly program
- Astro program
- Economical night program
- Extra switching times
- 56 memory locations
- 10 years battery-reserve
- Exchangeable (CR 2032)
- Minimum interval 1 min.
- Switching capacity 16A per channel
- Permanent by date and time/holiday function
- Manual permanent mode
- Manual override
- Automatic sorting of switching times on readout
- Fully automatic daylight saving time
- Elapsed time and pulse counter
- Easy handling
- Security by PIN-Code
- Complete switching program at a glance
- Optimised own consumption: only 0.2 W in "standby" mode
- Large, clear and illuminated display
- Quick and intuitive programming
- Can be programmed with supply disconnected
- Unlimited program security by E22-PROM
- NFC programming via smartphone/tablet (free 'Sangamo Connect' Android app required)
